Journal of Fluid Mechanics Volume 550 10 March 2006

A. R. Thornton, J. M. N. T. Gray & A. J. Hogg	A three-phase mixture theory for particle size segregation in shallow granular free-surface flows	1
A. J. Youd & C. F. Barenghi	Hydromagnetic Taylor–Couette flow at very small aspect ratio	27
S. Le Dizès & S. Leblanc	Note on "Multi-frequency Craik–Criminale solutions of the Navier–Stokes equations" by B. R. Fabijonas and D. D. Holm	43
P. A. Davidson, T. B. Nickels & P.-Å. Krogstad	The logarithmic structure function law in wall-layer turbulence	51
T. W. H. Sheu & H. P. Rani	Exploration of vortex dynamics for transitional flows in a three-dimensional backward-facing step channel	61
N. B. Kaye & P. F. Linden	Colliding turbulent plumes	85
F. Charru & E. J. Hinch	Ripple formation on a particle bed sheared by a viscous liquid. Part 1. Steady flow	111
F. Charru & E. J. Hinch	Ripple formation on a particle bed sheared by a viscous liquid. Part 2. Oscillating flow	123
E. Yariv	Self-propulsion in a viscous fluid: arbitrary surface deformations	139
M. Le Bars & M. G. Worster	Interfacial conditions between a pure fluid and a porous medium: implications for binary alloy solidification	149
R. A. Antonia & P. Burattini	Approach to the 4/5 law in homogeneous isotropic turbulence	175
Y. Li & M. Gaster	Active control of boundary-layer instabilities	185
E. Lindborg	The energy cascade in a strongly stratified fluid	207
K. R. Rajagopal	On implicit constitutive theories for fluids	243
D. S. Pradeep & F. Hussain	Transient growth of perturbations in a vortex column	251
C.-J. Gan & Z.-N. Wu	Short-wave instability due to wall slip and numerical observation of wall-slip instability for microchannel flows	289
X. Wu & L. W. Hogg	Acoustic radiation of Tollmien–Schlichting waves as they undergo rapid distortion	307
J. Bec, L. Biferale, G. Boffetta, A. Celani, A. Cencini, A. Lanotte, S. Musacchio & F. Toschi	Acceleration statistics of heavy particles in turbulence	349
J. R. Elston, H. M. Blackburn & J. Sheridan	The primary and secondary instabilities of flow generated by an oscillating circular cylinder	359
X. Wu, J. Schlüter, P. Moin, H. Pitsch, G. Iaccarino & F. Ham	Computational study on the internal layer in a diffuser	391
X. Shan, X.-F. Yuan & H. Chen	Kinetic theory representation of hydrodynamics: a way beyond the Navier–Stokes equation	413
BOOK REVIEW		
Matrix Preconditioning Techniques and Applications, by K. Chen		442
